About me

I have 2 years of experience in developing web applications, using cutting-edge technologies such as React, Next.js, and TypeScript to create dynamic and efficient applications that meet the needs of users.

Objective

Front-end developer.

Experience

Freelancer - 2023 (current)

Projects

Fotoseek ([Link](#))

Fotoseek is an application that allows you to download high-quality images and videos. With Fotoseek, you can easily search and save media files from various online sources.

Tw Palette ([Link](#))

Create, generate colors through HEX or HSL. This tool is able to return a consistent color palette for Tailwind, CSS, Sass or JavaScript applications.

UniSaver ([Link](#))

UniSaver is an application that allows you to download videos from YouTube quickly and easily. With UniSaver, you can save your favorite YouTube videos for offline viewing.

Codify ([Link](#))

Codify is a music app that allows users to listen to music locally on their PC offline.

Thunder Games 2021 - 2023

Front-end developer: Creation of interfaces with HTML, CSS and JavaScript, bug fixing and assistance in interface and user experience improvements. Note: private service.
